

200LEVEL GST RHEMA

JUNE 2025 POWERED BY LADI

Science & Technology

1. The Leibniz 1671 Mechanical computers(machines)had which capacity? A. Addition and subtraction B. addition, subtraction, multiplication and division C. polynomial evaluation by method of finite difference D. general-purpose computation
2. The Babbage: difference machine 1827 Mechanical computers (machines) had which capacity? A. Addition and subtraction B. addition, subtraction, multiplication and division C. polynomial evaluation by method of finite difference D. general-purpose computation
3. ...is used to return drilling cuttings to the surface during drilling. A. Mud B. Water C. Lubricant D. Emulsion.
4. The errors resulting from complex calculations handled by humans are attributed to all except? A. carelessness B. fatigue C. distraction D. technological advancement
5. The function of the brain in the human computational system includes all except A.to interpret instructions B.to store instruction to be executed C.to carry out specific data manipulation D.to ensure the outline sequence in the paper is followed
6. A computer network is a collection of and A. printer and scanners B. key board and monitor C. computers and peripheral devices D. hard disk and memory
7. A network established between computers within a building is called A. Local Area Network B. Wide Area Network C. Small Area Network D. Building Area Network
8. Which of these devices can convert the potential energy of tides into electric energy? A. Condenser B. Pump C. Compressor D. Turbine
9. The involuntary inflow of fluid into the well during drilling is known as A. Blowout B. Leakage C. Kick D. formation damage
10. The ability of a rock to store Petroleum is called A. Permeability B. Porosity C. Saturation D. Wettability
11. Petroleum was first discovered in.....place in Nigeria. A. Oloibiri B. Brass C. Nembe D. Gelegale.
12. The probability that a device or machine will satisfactorily perform its specified function for a given period of time under a given set of operating condition is known as A. Operation research B. Engineering economics C. Systems engineering D. None of the above
13. ...is concerned with problems encountered in the operation of congested systems A. Linear programming B. Dynamic programming C. Geometric programming D. Queuing theory
14. Product layout is suitable for what type of production method A. Job shop production B. Mass production C. Batch production D. Robots manufacturing
15. Either production layout can be adopted by companies that are into batch production. A. Fixed or functional B. Functional or product C. Product or group D. Group or functional
16. An Artifact is defined in structural engineering as any object that is: A. of archaeological importance B. of good artistic impression C. of imposing architectural stature D. for man's use and for his convenience
17. Structural Engineering curriculum was designed A. to encourage specialization B. due to other engineering disciplines being uninteresting C.to increase number of structures in Nigeria D. because of its superiority to other engineering disciplines
18. One of these is not a study area for the intending structural engineer A. organic chemistry B. theory of structures C. design of structures D. strength of materials
19. If the main column of a commercial building crushes under the weight of its service loads this failure does not meet one of the following design criteria A suitability B.serviceability C.aesthetics D.safety
20. The fourth largest field in engineering is. A. Chemical Engineering. B. Civil Engineering. C. Computer Engineering. D. Electrical and Electronic Engineering.
21. One of the first industries that witnessed a massive upsurge as a consequence of industrial revolution is the. A. Chemical industry. B. Process industry. C. Textile industry. D. Manufacturing industry.
22. The List of Ten Greatest Achievement of Chemical Engineering was compiled by A. Nigerian Society of Chemical Engineers. B. World Congress of Chemical Engineers. C. The American Institute of Chemical Engineers. D. The World Congress of Achievement analysis.
23. Which of the following organisms lacks a chlorophyll A.fungi B. plants C. algae D. angiosperm
24. The most important group of microorganisms involved in food production is the A. mushroom B.cyanobacteria C. Fusarium D. yeast
25. Which of the following organisms is used for beer production? A.Saccharomyces carlsbergensis B. Saccharomyces cerevisiae C. Saccharomyces pumbe D. all of the above
26. Fermented foods are foods whose major properties are dependent on microbial..... A. interactions B. identity C. type D. action
27. The first generation electronic computers had which technologies? A. vacuum tubes, acoustic, memories, CRT memories B. Discrete transistors, ferrite cores and magnetic disks C. Integrated circuits (SSI and MSI) D. LSI/VLSI circuits, semi-conductors memories
28. Aiken: Harvard mark I 1944 Mechanical computers (machines) had which capacity? A. Addition and subtraction B. addition, subtraction, multiplication and division C. polynomial evaluation by method of finite difference D. general-purpose computation
29. A block moulder who fabricates six inches blocks for a residential building is likely to join these blocks together using A.mortar B.pestle C.plaster D.blender
30. Granite is a common structural road element which forms its A. surfacing B. stone base C.sub-base D.grade
31. A narrow long concrete mix laid in a foundation trench before placing foundation blocks is known as A. box foundation B. raft foundation C. pile foundation D. strip foundation
32. A two dimensional (defined by x and y axis) structural element that behaves like a beam is known as A. rait B. membrane C. slab D. cable
33. Which of the following processes separates crude oil into its constituent fractions? A. Chromatography B. Distillation C. Fracking D. Gasification
34. For fusion to occur,two nuclei must overcome what force?A.Electrostatic attraction B.Electrostatic repulsion C.Electrostatic defraction D.Electrostatic
35. What is the function of the control unit of the in the central processing unit (CPU)? A.to ensure that there is no conflict in the operation of computers B.to co-ordinate the whole activities of the computer system C.to solve all logical and arithmetic operations D. option"a"and "b"
36. Natural gas is characterized by 88% methane A.True B.False C.Indifferent D.All of the above

37. The least fluid that can be found in a reservoir is A. Gas B. Water C. Oil D. All of the Above
38. Where and when was the first commercial well drilled in Nigeria? A. Bayelsa, 1955 B. Oloibiri, 1956 C. Ondo, 1955 D. Rivers 1956
39. _____ is not a type of beam? A. Simply supported B. Overhanging C. Beams with fixed support D. None of the above
40. Which of the following is not a branch of land surveying? A. Geodetic survey B. Topographic survey C. Cadastral survey D. Engineering survey E. None of the above
41. Which type of survey deals with establishing boundaries of properties? A. Geodetic survey B. Topographic survey C. Cadastral survey D. Engineering survey
42. A design team is made up of one of these except? A. A Structural Engineer B. A Architect C. A Mechanical Engineer D. None of the above
43. Which of these materials is commonly used for construction of structures? A. Concrete B. Fine aggregate C. Cement D. Wood
44. Which of these is not part of the structural elements of a building? A. Foundation B. Beams C. Columns D. None of the above
45. Which of these constitutes a non-structural element of a building? A. Windows B. Beam C. Columns D. Roof
46. An Example of a night room is? A. Kitchen B. Bedroom C. sitting room D. Dining room
47. The "surface" of a road is also known as... A. Crown B. Base C. Sub-base D. Sub-grade
48. In highway appurtenance, DPC is an acronym that is referred to as A. Drainage proof course B. Drain proof course C. Drag proof course D. Damp proof course
49. In water resources, which of the following is not a good source of water? A. Impound Reservoir B. Rain C. Lake D. None of the above
50. Which branch of engineering deals with the disposal of both solid and liquid waste? A. Environmental Health engineering B. Highways engineering C. Structural engineering D. Geotechnical engineering
51. Prokaryotic cells are found in a) Algae b) monerans c) tracheophytes
52. Organisms which feed on dead or decaying organic matters are called a) saprophytes b) symbionts c) parasites d) commensals
53. The process of separating materials from crude oil is known as a) saponification b) filtration c) fractional distillation d) all of the above
54.) what are the two prominent programmes that constitute Production Engineering Department at the University of Benin
55. a) Industrial and Biomedical Engineering b) Manufacturing and Biomedical Engineering * c) Mechanical and Manufacturing Engineering
56. d) Industrial and Manufacturing Engineering
57. The study that is primarily concerned with the design, manufacture, operation, maintenance, repair, and further development of machine or machine systems is known as (A) Mechanical Engineering (B) Metallurgy (C) Mechanics (D) Production Engineering
58. All the following are example of power — generating machines except (A) Internal Combustion Engines (B) Turbines (C) Generators (D) Refrigerators
59. Simple machine are mechanical devices such as the following except (A) Pin (B) Wedge (C) Pulley (D) Screw
60. For any material to be considered as a structural material, it must possess among others the following two characteristics (a) beauty and strength (b) beauty and tough (c) cheap and economical (d) toughness and durability
61. The bottom line of the whole concept of design is to avoid (a) failure (b) redesign (c) movement (d) none of the above
62. —has being identified as the reason why clients often do not patronize consultants (a) ignorance and cost (b) money (c) distance (d) none of the above
63. Civil Engineering has to do with: A) Transformers b) cars (c) canals (d) all of the above
64. The difference between Aerial and Terrestrial photography is found in (a) level of camera (b) metric picturing (c) percentage photo (d) none of the above
65. One of these is not a subdivision of Civil Engineering (a) highways and transportation (b) structures (c) optometry instrumentation (d) all of the above.
66. Which property of a rock defines its storage capacity? (A) Porosity (B) Permeable (C) Porous (D) Permeability
67. AGO, a kind of petroleum products, means? (A) Automatic Gas Oil (B) Automatic Gasoline Oil (C) Automobile Gasoline Oil (D) Automotive Gas Oil
68. The property of a rock that measures the permeability of fluid within the connected pores of rock is called? (A) Porosity (B) Oil formation (C) Permeability (D) Seal
69. Renewable energy resources are those which will —themselves naturally in a relatively short time. A) Replenish B) increase C) Destroy D) Deplete
70. The following are renewable energy resources except? A) coal B) Solar C) Geothermal D) Biomass
71. Which of the following does not belong to the family of renewable energy A) Solar energy B) Wind energy C) Wave energy D) Coal energy.
72. A computer that responds to analogue signal is called computer (a) Analog (b) universal (C) clone (d) digital
73. Generator converts energy (a) mechanical to electrical (b) electrical to mechanical (c) electromechanical to electromechanical (d). all of the above
74. Electronics engineering deals with (a) high voltage and high current (B) low Voltage and low current (c). high voltage and low current (d) low voltage and high current
75. The fundamental principle of generation of electrical energy is based on (a). eddy's law of electromagnetic induction (b). Lenz's law of electromagnetic induction (c). coulomb's law of electromagnetic induction (d). faraday's law of electromagnetic induction
76. The first industries that witnessed a massive upsurge as a consequence Of the industrial revolution is (A). Music industry. (B) Chemical industry (C) Petroleum industry. (D) Textile industry.
77. The following include ten greatest achievement of Chemical Engineering EXCEPT (A) The Human Reactor. (B) Microbial Fermentation. (C) Liquefied Air (D) Wonder of Drugs for the Masses.
78. The first course in chemical engineering was offered at the (A) Manchester Technical Academy. (B) Massachusetts Society of Technology (C) Manchester Technical School. (D) Massachusetts Institute of Technology.
79. The following would conduct electricity except..... (A) Gold (B) Silver (c) human body (d) plastic.
80. Silver is not normally used as a conductor because..... (a) it is not a good conductor (b) it is too light (c) It is expensive (d) none of the above
81. Which of the following will conduct electricity at all temperatures (a) insulators (b) semiconductors (c) conductors (d) none
82. Which is of the following is encountered in Petroleum Engineering (A) Rotary drilling rig (B) Stethoscope (C) Telescope (D) Microscope
83. Non Ferrous metals include the following except (a) Alloy Steel (b) Tungsten (c) Molybdenum and their alloys (d) Copper

- Waste can exist in the following states of matter which are (a) Solid, liquid, gas (b) Liquid, gas, ice (c) Domestic, commercial, industrial (d) Biodegradable, non-biodegradable
- The first natural philosopher, who was also credited with predicting the eclipse of the sun in 585BC is (a) Socrates (b) Aristotle (c) Thales (d) Pythagoras
- The notion of envisaging the universe as a machine governed by inflexible laws by the ancient Greeks is referred to as (a) Existentialism (b) Rational Materialism (c) Realism (d) Atheism
- The two theories refuted by Aristotle, the great Greek philosopher are those of the (a) Atomist and Axiomist (b) Pneuma and realist (c) Atomist and Stoics (d) Atomist and realist
- The supreme natural philosopher that pioneered the understanding of the philosophical phenomena of nature is (a) Plato (b) Aristotle (c) Socrates (d) Euclid
- Which of the following is used to separate a solid dissolved in a liquid (a) Melting (b) Magnetization (c) Sublimation (d) Evaporation
- What are the number of proton, neutron and electron in Carbon (a) 6,6,6 (b) 3,7,1 (c) 4,6,12 (d) -12,0,0
- When a compound change from the solid state to gas state, the compound is said (a) evaporate (b) disappear (c) sublime (d) solidify
- Oxygen has its symbol as (a) O (b) St (c) Tn (d) Sm
- The smallest particle of a compound that can exist freely is (a) atom (b) Molecule (c) ion (d) electron
- _____ is the reaction of long chain ester and alkaline solution (a) esterification (b) saponification (c) fermentation (d) hydrolysis
- The processing of materials for reuse as a different product is known as (a) Reclamation (b) Energy recovery (c) Sanitary land fill (d) None of the above
- Which of the following genetic notation is used to represent Klinefelter's syndrome? a.XYY b.XXY c.XXX d.YO e.XO
- Humans have _____ pair of chromosomes a. 21 b.22 c. 23 d.24 e.25
- The first 22 pairs of human chromosomes are referred to as a. Autosomes b. Chromosomes c. Sex Chromosomes d. Polyosomes e. Dictyosomes
- A cross involving only one pair of contrasting characteristics is called (a) Monohybrid cross (b) Dihybrid cross (c) Reciprocal cross (d) Back cross (e) Test cross
- Which of the following is not a type of sex determination? a.XX-XO b.XX-XY c.YY-YO d.XY-XX e.ZW-ZZ
- Which of the following syndrome gives rise to a tall aggressive male? a. XYY b. XXY c. XXX d. YYY e. XO
- Traditionally, living organisms were divided into two groups, but modern science has included a third group known as (a) Animalia (b) Plantae (c) Monera (d) protista (e) Fungi
- Microorganisms include the following except (a) Viruses (b) Bacteria (c) Protozoa (d) Slime molds (e) None of the above
- _____ is usually being referred to as sub cellular in structure a. Viruses b. Bacteria (c) protozoa (d) Slime molds (e) None of the above
- Viruses are _____ parasites a. Facultative b. Obligate c. Semi facultative d. semi obligate (e) None of the above
- _____ is regarded as the smallest cellular microorganism a. viruses b. bacteria (c) Protozoa (d) slime molds (e) None of the above
- One of the following is an example of a bacterial disease a. Rabies (b) Lassa fever (c) Cholera (d) Malaria (e) Ring worm
- Viruses can only replicate with the aid of (a) Nutrient Agar (b) Dead host (c) Living host (d) Vector host (e) Only plant host
- Another name for the cyanobacteria is (a) blue-green algae (b) Red-green algae (c) yellow-red algae (d) Blue-green yeast (e) Red-green yeast
- The protozoans have no (a) cell membrane (b) Nucleus (c) Cytoplasm (d) Cell wall (e) None of the above
- _____ is common between fungi and algae a. Cell wall (b) Cell membrane (c) Nucleus (d) None of the above
- The use of sunlight to degrade organic material waste is known as (a) Biodegradation (b) Photosynthesis (c) Pyrolysis (d) photodegradation
- The type of biodegradation that involves the provision of enabling environment for the growth and multiplication of microorganisms found in organic wastes is known as (a) Bio augmentation (b) biostimulation (c) biocatalysis (d) none of the above
- The process whereby waste substances are consumed in oxygen free atmosphere is known as (a) pyrolysis (b) incineration (c) thermography (d) none of the above
- Waste treatment technique that the removal of suspended solid particles from liquid waste by gravitational settling known as (a) Ion exchange (b) Oxidation and reduction (c) Sedimentation (d) Screening
- The following are unit operations except (a) Crystallization (b) Biotechnology (c) Drying (d) Distillation (e) Extraction
- The following include ten greatest achievement of chemical engineering except (a) Microbial fermentation (b) The human reactor (c) Liquefied air (d) Wonder drugs for the masses (e) The atom
- The most recent index to measure a country's level of technological development is (a) ICT industry (b) The development of chemical industry in a country (c) The amount of crude oil produced in a country (d) The number of satellites launched into space by the country (e) none of the above
- The liquefied purified nitrogen can be used to do the following except (a) Recover petroleum (b) Freeze foods (c) produce semiconductors (d) prevent unwanted reactions (e) smelt copper
- Liquefied oxygen can be used to do the following except (a) Make steel (b) Weld metals together (c) Recover petroleum (d) Smelt copper (e) support the lives of patients in the hospital
- One of the following engineers was refers to as an alkali inspector in 1880 (a) Davis Norton (b) Gorge E. Davis (c) A. D Little (d) Mc Adams (e) T. O. K Aydu
- An example of a hydraulic structure is (a) dam (b) beam (c) column (d) slab
- which of the following theories of the origin of biological system is not subject to scientific explanation (a) steady state theory (b) spontaneous generation theory (c) Cosmozoan theory (d) special creation theory
- the biochemical evolution theory is credited to (a) Alexander oparin (b) Aristotle (c) Louis Pasteur (d) archbishop usher of Armagh
- Evolution of natural selection relies upon (a) heritable variation (b) overproduction of offspring (c) a struggle for existence (d) all of the above
- the technologies involved in the first generation computer are the following except (a) vacuum tubes (b) integrated circuits (c) memories (d) acoustics
- which of the options below is not true about unit vectors (a) they have magnitude of 1 (b) they have the same effect as two or more vectors put together (c) they are direction indicators (d) the three unit
- the state of continuous change in position of a body is (a) velocity (b) aesthetic (c) safety (d) sustainability

166. In a combination of A and E proposition when the A proposition is True the E proposition is - A) True B) false C) undetermined D) none of the above
167. The A and I Propositions were derived from the Latin word called A) affirmative B) affirm C) affiliate D) affirmine
168. Euler's formulation or diagram is used to represent diagrammatically A) class membership B) cult membership C) objects membership D) All of the above
169. A and u Propositions are A) subalterns B) contraries C) contradictories D) none of the above
170. The period of consensus among scientists is A) normal science B) abnormal science C) revolutionary science D) positive heuristic
171. argued that the function of philosophy should be the logical clarification of thought A) Dewey B) G.E. Moore C) Rorty D) Wittgenstein
172. main philosophical schools in ancient Egypt include A) Tel-el Arman, memphites B) Hermopolitan; Theban, Avaris C) Heliopolitan D) All of the above
173. which of these represents the major branches of philosophy A) Logic and philosophy B) Axiology, Epistemology, Logic, value C) Axiology, Epistemology, Logic and metaphysics D) All of the above
174. The E and O Propositions were derived from the latin word called A) nebula B) nego C) neio D) negative
175. One central task of logic is to outline the procedure for arriving at valid conclusions when one is given a set of premise A) False B) True C) undetermined D) None of the above
176. one good reason for supposing that we cannot know the kind of things that most people think they can know is that A) people cannot be trusted B) people tell lies C) Human beings are fallible D) All of the above
177. Materialist metaphysics is a system of philosophy which upholds A) The primacy of spirit B) The primacy of ideas C) The primacy of matter D) All of the above
178. The relationship between the A and O Propositions is called A) contraries B) alternations C) contradictories D) sub-contraries
179. According to Ruch and Anyanwu, the rejection of African philosophy was due to A) slavery B) colonial capitalism C) Racism D) All of the above
180. The proposition CHRISTIAN ARE NOT TERRORIST when translated into standard form categorical proposition is - A) A proposition (universal affirmative) B) I Proposition (particular affirmative) C) O proposition (universal negative) D) E proposition (universal negative)
181. All Nigerians are kind (2) Hamza is a Nigeria (3) Therefore, Hamza is kind in this argument (2) is called A) Conclusion B) Major premise C) Minor premise D) Syllogism
182. When one accepts or rejects a conclusion because he/she, himself/herself has no heard of an opposing view (even if it exists), this is A) Appeal to authority B) Attack against the personality C) Appeal to ignorance of the opposites D) All of the above
183. For Augustine, the love of country, the faith of friendship, just dealings and all things belonging to good manners in relation to the state belong to the A) Worldly city B) Earthly city C) Secular city D) All of the above
184. If a term is not distribute in the premises it must not be distributed in the conclusion. This is A) Rule of quality B) Rule 9 C) Fallacy of illicit D) Rule 10
185. When one argue that something say "B" does not exist because no one has seen "B" such argument is guilty of A) Argumentum and Misericordiam B) Argumentum and vericundiam C) Argumentum and ignoratiam D) Argumentum and hominem
186. What we have in science according to Karl Popper is A) Sound and valid theories B) Objective C) Truth D) Verisimilitude
187. Following the fallacy of Argumentum and ignoratiam the idea of and as sources of knowledge may hardly be established. A) Introspection and revelation B) Memory and authority C) Intuition and Authority D) All of the above
188. and are approaches to metaphysics A) Idealism and purism B) Purism and materialism C) Idealism and materialism D) None of the above
189. Philosophy concerns itself with A) Something B) Nothing C) All thing D) All beings
190. Nkrumah is noted for his philosophical thought called A) Nkrumahism B) Conscientism C) Conscientism D) All of that above
191. The period when the previous accepted theories are jettisoned for others is A) Normal B) Abnormal C) Revolutionary D) Protective belt
192. Which of these is a problem in African philosophy? A) Language translation; tradition, rationality documentation B) Logic; History; source; origin C) Method; definition; application D) All of the above
193. The argued that language is a system that is largely cultural learned through social interaction A) Functionalists theories B) Chomsky's generative theories C) Continuity based theories D) Discontinuity based theories
194. Why is ethics important A) It helps us to fashion out the best course of action for ourselves and others B) It is a moderator of moral dilemmas C) Without ethics man-in-society would be like a feral being in the jungle D) All of the above
195. The following are Plato dialogues that contain his contribution to Philosophy except A) Ethics B) Apology C) Meno D) Pythagoras
196. identified the critical nature of philosophy as a "Negative appraisal of received ideas" A) P.O. Bodunrin B) M.O. Momoh C) S.E. Soyinka D) O.A. Okoh
197. The word mores which means the customs or manner of any given society is called A) Moral philosophy B) Morality C) Meta-physics D) All of the above
198. A relationship where in the truth of one proposition implies the truth of the other and falsity of the other implies the falsity of the one is known as A) Contraries B) Sub-contraries C) Alternation D) Contradictories
199. According to Augustine, "Those who seek beatitude for the state through the church belong to A) The city of God B) The heavenly city C) Angels city D) A and B only
200. is the form of argument that is prejudicial and dwells on emotions, pain or desire of a population A) Argumentum and ignoratiam B) Argumentum and hominem C) Argumentum and Baculum D) Argumentum and populum
201. To say that science do not involves idiosyncratic beliefs, is to say that science is A) Impersonal B) Public C) Logical D) Specific
202. I have some runs tonight is - definition A) Stipulative B) Ostensive C) Theoretical D) Precising
203. is not feature of language A) Transparency B) Universality C) Assertiveness D) Meaningfulness
204. A relationship between Propositions such that both can be true but both cannot be false is A) Contraries B) Socialism C) Private ownership D) Individualism
205. The attention of the pre-Socratic philosophers was on A) Supernovas B) Mythology C) Tabula rasa D) Natural phenomena

206. To say that science is dispassionate and unprejudiced because they do not admit of value judgment means science is not (A) Logical (B) Personal (C) Subjective (D) Public
207. The first meaning and definition of philosophy is found in the - (A) Inscription of Egypt (B) Inscription of PTA hotep (C) Inscription of ipuwer and Imhotep (D) Inscription of antef
208. - argued that language originated in the transition from pre-hominids to early man, given that language is a unique human trait that cannot be found making non humans (A) Chomsky's generative based theories (B) Functionalists theories (C) Continuity based theories (D) Discontinuity based theories
209. The first period in the history of Western philosophy is characterized as - (A) Age of faith (B) Age of reason (C) A and B (D) Age of science
210. All of the political philosophers expect (A) Aristotle (B) Leibniz (C) Hobbes (D) Locke
211. - is the knowledge of our thoughts and feelings (A) Rationalism (B) Empiricism (C) Introspection (D) Revelation
212. The goal of language is - (A) For the purpose of communication (B) For the clarify of our thoughts (C) For the clarification of ideas and opinions (D) All of the above
213. The attention of the Socratic philosophers was on (A) Universe (B) Man (C) Society (D) B And C
214. Who made the comments "When you say African philosophy you say that accept of philosophy when arise from a special problem and the unique experience of the African people (A) K.C Anyanwu (B) S.O sodipo (C) C.B Okelo (D) P. Iroegbu
215. A definition is circular when (A) When the term being defined is contained in the definiens (B) When the term being defined is used as part of the definition (C) A and B (D) A only
216. Thomas Kuhn classifies science into how many stages (A) 5 (B) 3 (C) 2 (D) 4
217. Which of these are Egyptian philosophers (A) Imhotep, Amenhotep (B) Pta-hotep; Akhenaton (C) Amenhotep; ipuwer (D) All of the above
218. From the ancient Greek perspective philosophy meant (A) Love of wisdom or knowledge (B) Curiosity (C) Process of fundamental critical inquiry in search for truth of things (D) All of the above
219. Which of the following is not a type of definition? (A) Ostensive definition (B) Persuasive definition (C) Supulative definition (D) Moral definition
220. When one proposition is contrary to the other if one proposition is true, the other is false but if the other is false, the other is (A) True (B) False (C) Undetermined (D) None of the above
221. For - language is an innate faculty that is largely genetically encoded (A) Thales (B) Anaximander (C) Anaximenes (D) Chomsky
222. Morality is tinged on (a) determinism (b) praise (c) blame (d) reason
223. fallacy is often mistaken for "Ignoratio Elenchi". (A) False Analogy (B) Argumentum ad Verecundia (C) Non-sequitor (D) Argumentum ad Populum
224. "The unexamined life is not worth living" says (a) Thales (b) Anaximander (c) Anaximenes (d) Socrates
225. Who is the first Western philosopher? (a) Socrates (b) Plato (c) Thales (d) Protagoras
226. Etymologically, philosophy means (a) love of reason (b) love of experience (c) love of commonsense (d) love of wisdom
227. The philosopher that said everything is made of water is (a) Plato (b) Socrates (c) Thales (d) Anaxagoras
228. Pre-Socratic philosophy was a departure from (a) mathematics (b) mythology (c) meteorology (d) meta-philosophy
229. According to - philosophy "is the rational (de jure), indubitable cognition of things in the light of their ultimate justification". (a) Aristotle (b) Plato (c) Socrates (d) Thales
230. Philosophy started when men no longer accepted the - explanation of the world. (a) traditional/natural (b) mythological/religious (c) dogmatic/authoritarian (d) scientific/empirical
231. Philosophy started with (a) curiosity (b) wonder (c) fear (d) doubt
232. The first set of philosophers to systematically raise existential questions are the (a) Milesians (b) Spartans (c) Egyptians (d) Macedonians
233. In the etymology of the word 'Philosophy', 'philo' derived from the Greek 'philein' means (a) filia (b) wisdom (c) love (d) knowledge
234. In the etymology of the word 'Philosophy', 'sophia' means (a) love (b) wisdom (c) filia (d) science
235. The word 'philosopher' means (a) kno. of wisdom (b) lover of knowledge (c) lover of wisdom (d) a wise person
236. Who coined the word 'philosopher' (a) Protagoras (b) Pythagoras (c) Thales (d) Plato
237. Western Greek philosophy began in (a) 4th century BC (b) 5th century BC (c) 6th century BC (d) 7th century BC
238. The basic tool for doing philosophy is (a) reason (b) sense (c) scientific instruments (d) revelation
239. Which are the three conditions of knowledge? (a) truth, justification and evidence (b) validity, justification and belief (c) certainty, evidence and validity (d) justification, truth, and belief
